### Application

The smc-DA series of lenses are specifically designed for and are intended to be used with Pentax digital SLR cameras. They are designed to optimally match the performance of the digital technology and design of Pentax digital cameras.

Interesting photography begins where "snapshots" end. With a focal length of 24mm (equivalent in 35mm) impressive new wider-angle views that are unattainable with a standard zoom lens. This versatility is further enhanced by the ability to zoom to a focal length of approximately 70mm (equivalent in 35mm). And these achievements are underlined by maintaining a fixed aperture of f4.0 throughout the entire zoom range.

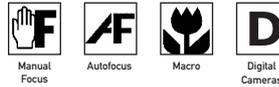

The manufacturer reserves the right to changes in technology, design, equipment and scope of supply without advance notice.
