There are many ways to get great photos.
Take the easiest.

- > 8.1 Megapixel resolution for images of optimal photographic quality – and for outstanding cropped enlargements and posters.
- > PENTAX zoom lens constructed of high-quality optical glass lens elements with 3x optical and 4x digital zoom.
- > Video function recorded in 640x480 resolution at 30fps and video with sound at 15fps.
- > Automatic Face Recognition for great people shots that are perfectly exposed and focussed.
- > Good pictures should be a snap with a modern camera but many pictures still fail due to blurring. With digital "Shake Reduction" great shots can be had even under poor lighting conditions.
- > Particularly good battery management enables up to 240 shots with one set of AA batteries or more than 500 pictures with rechargeable batteries.
- > 16 shot series – continuous shooting mode can record up to 16 consecutive images (640x480 resolution) in a 2-second burst. The perfect solution to analysing high-speed sports action.
- > The wider the picture angle the more exciting the picture. The Optio E40 combines 2 shots into a perfect panorama. You've never seen such amazing shots
