DA 18-55mm F3.5-5.6 AL **II**

- Compatibility with high-pixel (over 10 MP) image sensors through increased resolution
- New 18-55mm optical construction
- Application of SP Coating to the front surface
- Characteristics shared with the previous DA 18-55:
 - Front frame structure does not rotate when focusing
 - Enhanced MF operability using an independent focus ring
 - Greater MF operability using the Quick Shift Focus System
 - Metal lens mount

Protect) Coating

- Fluorine compound applied to lens surfaces through vapor deposition
- Coating works similar to fluids applied to car windshields to keep off water
- Keeps off dirt and allows easier cleaning
- Optical performance is similar to PENTAX's Multi-Coating; coating does not effect image quality
- Non-toxic substance
- Application on basically all future PENTAX lenses planned
